Projects

- **Real-Time Object Detection System** *2025*
  Self project | Python, PyTorch, YOLOv5, OpenCV, Streamlit **Github**
  – Built a real-time multi-object detector using **YOLOv5** and OpenCV for images, videos and webcam streams.
  – Optimized the inference pipeline for CPU-only execution and deployed it as an interactive **Streamlit** app.
- **Media Control through Hand Gestures** *2024*
  Self project | Python, MediaPipe, OpenCV, PyAutoGUI **Github**
  – Developed a real-time hand-gesture system to control play/pause, volume and navigation using **MediaPipe** hand landmarks and OpenCV.
  – Implemented landmark-based gesture recognition for responsive, touch-free human–computer interaction.
- **Multimodal Document & Image Assistant (Ongoing)** *Oct 2026 – Present*
  Self project | Python, LLM APIs, FastAPI **Github**
  – Building a **RAG**-based assistant that answers questions over PDFs and images with source citations, served through a **FastAPI** backend.
